PROFESSIONAL SUMMARY

Resourceful and detail-oriented Fullstack Developer and Cybersecurity student with a strong foundation in designing, building, and securing web and mobile applications. Proficient in React, Node.js, Python, and React Native, with a security-first engineering mindset. Proven track record of developing fullstack applications, implementing AI integrations, and participating in hackathons and tech communities. Passionate about writing scalable, performant code and protecting systems against vulnerabilities.

TECHNICAL SKILLS

- **Frontend Development:** React, TypeScript, JavaScript, Tailwind CSS, HTML5, CSS3, Framer Motion
- **Backend Development:** Node.js, Python, FastAPI, Django, PostgreSQL, REST APIs
- **Mobile Development:** React Native, Expo, Android, iOS development
- **Tools & Deployment:** Git & GitHub, Docker, AWS, Vercel, Manifest V3 (Chrome Extensions)
- **Cybersecurity & Systems:** Network Security, Penetration Testing, Cryptography, Risk Assessment, Linux, Bash Scripting

RELEVANT PROJECTS

PhishShield — AI-Powered Phishing Detection System

React, Tailwind CSS, Python, FastAPI, Chrome Manifest V3 | [Demo](#) | [GitHub](#)

- Engineered a secure, real-time phishing detection system comprising a Chrome Browser Extension (Manifest V3) and a web dashboard.
- Developed a high-performance Python and FastAPI backend to run machine learning-based classification algorithms detecting malicious emails and URLs.
- Designed a polished and responsive user interface using React and Tailwind CSS to alert users with dynamic security risks and metrics.

Libronet — Open-Source E-Library Platform

React, TypeScript, Tailwind CSS, Django, PostgreSQL | [Demo](#) | [GitHub](#)

- Built a responsive, feature-rich electronic library system enabling users to browse, search, and borrow digital books.
- Created a scalable Django REST Framework backend to manage book databases, transactional histories, and user roles.
- Implemented strict client-side validation using TypeScript and set up JWT-based authentication to secure endpoints.

Dispensar — Pharmacy Management System

React, TypeScript, Django, PostgreSQL | [Demo](#) | [GitHub](#)

- Developed a pharmacy inventory and sales management web application to simplify retail drug administration.
- Crafted a type-safe React client using TypeScript to manage complex component state, sales checkouts, and low-stock alerts.
- Structured a relational database using PostgreSQL and created secure APIs with Django to process daily business records.

WEDA — Real-Time Weather Forecasting Application

React, TypeScript, OpenMeteo API, Tailwind CSS | [Demo](#) | [GitHub](#)

- Designed a responsive dashboard pulling weather forecast metrics from the OpenMeteo API.
- Leveraged React hooks and TypeScript to parse raw JSON forecast payload and render it in user-friendly graphs and charts.

Medika — Healthcare & Doctor Discovery Platform

React, JavaScript, Tailwind CSS | [Demo](#) | [GitHub](#)

- Built an application facilitating simplified discovery and searching of medical professionals by specialty and location.
- Optimized search sorting and filtering functionalities directly within React for instantaneous client feedback.

EDUCATION

B.Sc. in Cybersecurity | Ongoing

Nasarawa State University, Keffi | 2024 – Present

- **Key Focus Areas:** Network Security, Ethical Hacking, Cryptography, Secure Software Development, Risk Assessment.

Diploma in Computer Science

Afripane Technologies Limited, Keffi | 2020 – 2023

- **Key Focus Areas:** Fundamentals of programming, data structures, algorithms, and software development methodologies.

EXPERIENCE & ACTIVITIES

Independent Tech Community & Open-Source Contributor | 2023 – 2024

- **Hackathons & Collaborations:** Competed in technical hackathons and partnered with cross-functional teams to conceptualize and ship MVP applications.
- **Version Control & CI/CD:** Maintained continuous delivery workflows using Git/GitHub for structured pull requests and branch management.
